Football Team

WORKSHOP

West African Sports Medicine Association

AFRICAN FOOTBALL MEDICINE

Sunday 12th April, 2015 - 9:30 - 11:30

Albert Suite - Second floor - QEII

There are massive differences between the perceptions and reality regarding Africa, and its players in regard to performance and sports medicine and this session aims to spark a discussion about issues pertinent to this demographic. A platform for establishing an effective, driven and motivated network to drive the development of sports medicine together on the region.

With regards to player care, a deeper understanding of an African athlete can enhance the relationships for player, club, coach and national team to create a winning situation for all a key topic will be making the transition from Africa to other locations in pursuit of their career and excellence.

Topics discussed will be the transition when leaving Africa, sudden cardiac death, MRI age verification and the impact of cultural beliefs.

Richard Rees Evans (Ghana/UK), Dr Prince Pambo (Ghana),
Dr Michael Segbefia (Ghana), Dr Yetsa Tuakli-Worsunu (Ghana),
Bakare Ummukulthoum (Nigeria), Mr Dayo Ogunkunle (Nigeria)
